

8-WEEK ONLINE COURSE

The AI Generalist

Becoming fluent in the tools that are defining the next decade.

Lecture 1 • Orientation & Welcome

BEFORE WE BEGIN

You're not late. You're early.

Most of the world is still figuring this out. Over the next six weeks, you'll get genuinely good at it.

Quick poll: who here has used an AI tool — ChatGPT, Gemini, anything — even once?

WHY THIS, WHY NOW

A real shift — not hype

The biggest change in decades

The way we work, create, and learn is being rebuilt — the way the internet once rebuilt it.

Moving faster than any wave

These tools improve month to month. Getting in now is a head start you can't buy later.

The advantage is in using it

AI won't replace most people — but people who use it well will outpace those who don't, in every field.

WHO THIS IS FOR

Built for you — whatever you study

Medicine

Law

Business

Design & Arts

Humanities

Sciences

Engineering

& every other

AI is a generalist skill now — like writing, or knowing your way around a computer.

WHERE YOU'LL LAND

By the end, you'll be able to...

Build your own AI assistant tuned to a task you actually care about

Generate images, audio & video create finished media from a prompt

Automate the boring parts wire AI into the apps you already use

Analyze data — no code required ask questions of spreadsheets and documents

Ship a small app of your own the capstone project, start to finish

Your 8-week journey

WEEKS 1-2

Use AI & prompt well

Get hands-on with text, images, audio and video from day one.

WEEKS 3-4

Build & apply

Make your own AI tools and put them to work in your field.

WEEKS 5-6

Go further

Real apps, your own data, combining tools — plus using AI well.

WEEKS 7-8

Your project

Bring it all together in something that's entirely yours.

How the course runs

Online & live

90-minute lectures you join from anywhere.

3 days a week, 8 weeks

A steady rhythm — easy to plan around.

Hands-on demos

Follow along and try every tool yourself.

Questions in the forum

Post in the course Q&A; live chat won't scale to 3,000.

IMPORTANT

Earning your certificate

75%

attendance —
mandatory

Below this, the certificate can't be issued. Plan around the schedule now.

All

quizzes & assignments

Take part in every one. They're how the skills stick — and they're required.

Earned, not given. Show up and do the work — the certificate, and the skills, are yours.

SET YOURSELF UP

How to get the most out of this

Try it the same day

Don't just watch the demo — open the tool and use it within the hour.

It's okay to feel behind

Week one feels like drinking from a firehose for everyone. That fades fast.

Experiment & break things

The students who poke, prod, and push the tools learn the fastest.

THE NEXT SIX WEEKS

Treat this like a superpower you're unlocking.

Show up. Experiment. Build.

See you on day two.
